US-PAT-NO: 6463304

DOCUMENT-IDENTIFIER: US 6463304 B2

TITLE: Application launcher for a two-way
mobile communications
              device

---------- KWIC ---------

Detailed Description Text - DETX (17):
   Representative operation of mobile device 100 is now described for
activation of a resident application. In operation, a user (not shown)
utilizing mobile device 100 of FIG. 1, starting with the device off, turns
mobile device 100 on by pressing the **power-on** button. Upon powering up, **image**
map 118 is **displayed on display** screen 104. This initial mode of operation is
referred to as a launch pad. **Image** map 118 provides an indication as to which
resident applications are assigned to which navigation keys in navigation key
group 112. The navigation key in the six o'clock position is assigned to a

notepad application as indicated by symbol 132. Pressing the navigation key in
the six o'clock position causes mobile device 100 to enter a notepad mode of
operation.
